We help businesses with a wide variety of systems ranging from single PC's to many networked systems. We've helped businesses upgrade their current systems or install new systems.

CCS was founded around the concept that there remains a need for a generalist; someone who can integrate hardware, software, and training together. We help you analyze each of these components to determine how all interact.

Like attorneys, accountants and other professionals, CCS provides ongoing advice, support, and service. We understand our clients' goals, because we stay with them for the long-term, and our advice leads to the achievement of those goals.

CCS believes in using existing resources and helping our clients get the most from their current systems before recommending acquisitions of new hardware and/or software.

In short, our goal is "*Helping You Do Business Better...*".

Reasons to call Custom Computer Services...

1. Time is valuable and scarce.
2. Equipment is inexpensive.
3. "Stuff" doesn't solve problems.
4. Businesses that don't keep up to date (employ technology) are losing their competitive edge.
5. We have a proven track record (we've been serving Michiana area businesses for more than 15 years)

Call CCS today to start getting more from your information systems investment.
